

# CONCRETE ON DEMAND

FRESH, HIGH-STRENGTH CONCRETE  
WHEN AND WHERE YOU NEED IT

# CONCRETE YOUR WAY

Antec is about options, because the concreting industry is not one size fits all, and standard pre-mix is not right for every job.

So we've brought Cemen Tech's volumetric technology to the Australian market, and with it comes a new level of flexibility and control.

Cemen Tech is a batch plant and mixer in one.

## CEMEN TECH RANGE

### TRUCK-MOUNTED

M Series and C Series – electric, diesel hydraulic, Power Take-off

- » Mobile batch plant
- » Suit a wide range of applications.

### STATIONARY

- » Great for precast operations
- » Store, proportion, mix and dispense concrete with one unit.

### TRAILER

- » Mobile batch plant that can be towed to site.

## HOW VOLUMETRIC WORKS?

Volumetric technology makes it easy. Load your materials in separate compartments and you're ready to go. In fact, you can be ready to pour in a matter of seconds.

Cemen Tech volumetric machines are calibrated by weight so there's no guesswork. The operator just needs to select from a range of mix designs then materials are dispensed via the linked dual auger system and conveyor belt into the mixing auger. Just 10 seconds later, materials are mixed and ready to pour.

Clean up is easy too - cleanout of the mixing auger takes less than five minutes. Then it's on to the next job, which can have a different mix design and quantity required until all the materials have been used.

## SUPPORT TO MATCH

Antec and Cemen Tech offer more than just the latest volumetric technology, with comprehensive training, around the clock telephone support and a 24-hour spare parts guarantee. We'll even help you out with concrete mix designs.

## WHY CEMEN TECH VOLUMETRIC?

### CONTROL

Mix specifications, time and production. Make adjustments at any time.

### QUALITY

Fresh concrete with maximum strength and workability every time.

### SPEED

Streamline production and turn projects around faster with less downtime and quick clean up.

### RELIABILITY

Materials are stored dry in separate compartments so there is no risk of setting.

### ADAPTABILITY

Suitable for short pours, readymix delivery, civil applications, mining, precast, shotcrete/gunite and specialty concrete including fast setting, coloured and pervious. Great for producing concrete in remote locations.

## ABOUT ANTEC

Antec is a leading supplier of concrete equipment products for the mining, minerals processing, civil, construction and infrastructure industries in Australia and globally, with a 30 year history. Its philosophy is built on customer service, relationship building and aftersales support.
